Did the report of the review contain an explicit statement that the review methods were established prior to conduct of the review and did the report justify any significant deviations from the protocol?; Item 3. Did the review authors explain their selection of the study designs for inclusion in the review?; Item 4. Did the review authors use a comprehensive literature search strategy?; Item 5. Did the review authors perform study selection in duplicate?; Item 6. Did the review authors perform data extraction in duplicate?; Item 7. Did the review authors provide a list of excluded studies and justify the exclusions?; Item 8. Did the review authors describe the included studies in adequate detail?; Item 9. If meta-analysis was performed did the review authors assess the potential impact of RoB in individual studies on the results of the meta-analysis or other evidence synthesis?; Item 13. Did the review authors account for RoB in individual studies when interpreting/discussing the results of the review?; Item 14. Did the review authors provide a satisfactory explanation for, and discussion of, any heterogeneity observed in the results of the review?; Item 15.
